Solidity

Monday, December 6, 2021   11:43 PM

https://safehedgecrypto.io

You can check the contract of this site from this url
https://etherscan.io/address/0x0f8bf37e79930c100f3d93ac0ee87f0d3e7a7fb0#contracts

I built the hedge token and delpoyed it.
Built that website using React.js and connect using web3

There are pool and farm functions now.
And users can change eth to hedge and hedge to eth.
And also, users can buy eth or other tokens by their cards or paypal.
This token is a successful token.
Did you check the token state and the price now?
The token price is getting higher from the deployment.

I did that website from the beginning to the end.

https://www.hodlgang.io/

At the bottom of the web page there is smart contract

Blockchain

Saturday, August 28, 2021   11:06 PM

Hello
I am a good blockchain engineer with rich experience in creation of crypto currency token.
The followings are tokens which I created and verified earlier.

https://etherscan.io/token/0x6f2057f83c05378f22a15b72a424367cb40abc1b
https://etherscan.io/token/0xbbdd490cedaae9eefa847de919137ddbb7f551c7
https://etherscan.io/address/0x7a0e91c4204355e0a6bbf746dc0b7e32dfefdecf

And I am very familiar to solidity for smart contract.
So, I am 100% of confident for your project.
Please hire me then you will get the result what you are looking for.
Best regards

Dear client, I have a solid knowledge of the Solana blockchain and NFT. I think you want the production similar to "https://www.pudgypenguins.io", "https://solpunks.com/",
"https://www.cryptokickers.com/". Also I am very familiar with Metaplex consisting of Creating and minting NFT, starting a variety of auctions for primary/secondary sales, visualizing NFT. Hope to discuss more details via chat. Best Regards.

Hi, As a Blockchain expert, I am familiar with NFT Marketplace, Crypto Tokens(ERC721, ERC20, BEP20, etc), Smart Contract, Solidity. I have done lots of similar projects like your requirement in the past.

https://coinmarketcap.com/currencies/freeway-token/
https://coinmarketcap.com/currencies/skycoin/
https://coinmarketcap.com/currencies/emirex-token/
https://coinmarketcap.com/currencies/bibox-token/
https://coinmarketcap.com/currencies/valor-token/

So I am sure I can complete it without a doubt.

Hope you discuss this via chat in more detail.
I look forward to hearing from you.

Sincerely,

Defi

Hi, Thanks for your posting. I am happy to send proposal on this project.

I have solidity experiences about building smart contracts and forking defi such as pancakeswap, sushiswap...

Also I am a senior developer have experiences in Blockchain, Ethereum, BSC, NFT and TradingView Chart with modern, trend technology such as React, Vue and Node.js.

And fortunately I have completed a similar project for an other employer just a few days before.
I am really feel confident about this project and I think that I'm the right person for this work because I have many good projects that I have accomplished.

You can check my previous works here.
https://defi.mglcoin.io/
https://app.treedefi.com

I really want to work for you. You will see my ability.
Please contact me for more discuss so we can start the project right now.

Lets finish this task ASAP

Best regards!

NFT all

Tuesday, December 14, 2021   9:50 PM

Hi, After carefully reading your post that you are looking for a coder who can work with NFT minting processes, I noticed that my skills and experiences fit with your requirements.

First of all, please take a look at this video showing my project of randomly minting NFTs from a collection of 10000 arts.

https://drive.google.com/file/d/1khOSKEANG-vTkCmwRlOlaqsY6reFpIyI/view?usp=sharing

In this project, I realized the following functions.

- Write a contract for NFT minting using Rust in the Solana blockchain
- use React and Typescript to build a frontend for the NFT mint function and wallet connection
- used web3 to interact with the contract

I am a Blockchain expert in developing NFT minting and NFT marketplace with full stack technology.

As a senior blockchain developer, in addition to projects like the above, I have already participated in many innovative NFT projects that are technically flawless (ERC721/1155 Contract, Mint WebSite, NFT Market Place). So, there is no problem with seamlessly meeting your requirements.

- My recent works
https://drive.google.com/file/d/1khOSKEANG-vTkCmwRlOlaqsY6reFpIyI/view?usp=sharing

https://drive.google.com/file/d/1yQSr9HwlckadB-w_AhQ2LYbPhJTf1IJe/view?usp=sharing

https://drive.google.com/file/d/1984vQ7-0WZKegQINhsWytDrj6DlPgBYH/view?usp=sharing

https://drive.google.com/file/d/1XkR0UCiwYN0_lXzhVCJJKhDi509AqZ1O/view?usp=sharing

https://cryptoetsnft.io/
https://desertedzebras.com/
https://www.thekittybutts.com/

- My skills

* upload arts to IPFS and get metadata, tokenURI
* create ERC721 smart contract or Rust program for NFT mint
* create a frontend for mint NFT and show minted NFT - with React, Typescript
* wallet connection(Metamask, binance wallet, Phantom, wallet connect, and trust wallet) and web3 integration with web3.js and ether.js
-buy and sell minted NFT on this frontend directly or secondary marketplace like opensea.io

I will do my best for you to provide High Quality and High Speed.
pleass contact me so that we can discuss more.
Best Regards

NFT, ERC721 experience

Friday, October 8, 2021   1:24 AM

Hi, As a senior blockchain developer, I have already been involved in many innovative NFT projects(ERC721/1155 Contract, Mint WebSite, NFT Market Place) that are technically flawless.
So no problem with satisfying your requirement seamlessly.

- My works
https://pets.micropets.io/
https://cryptoetsnft.io/
https://desertedzebras.com/
https://www.thekittybutts.com/
https://faraland.io/
https://themekaverse.com/

I solved the points like the following in these projects

-upload arts to IPFS and get metadata, tokenURI
-create ERC721 smart contract for NFT
-create a website for mint NFT and show minted NFT
-wallet connection(metamask, binance wallet, wallet connect and trust wallet) and web3 integration with web3.js and ether.js
-buy and sell minted NFT on secondary marketplace like opensea.io
-frontend development by React/Web3

So I can even deploy your project on testnet in which you don't have to pay for gas fees and then if you are satisfied, you can safely deploy it on Mainnet.

I will do my best for you to provide High Quality and High Speed.

Best Regards

I had experience of NFT game like that: cryptoZombie with DNA. In addition, I have experience in receiving orders from a NFT artist and generating 10k NFT images according to the ERC721 protocol.

NFT frontend

Thursday, December 16, 2021   3:37 PM

Hi, As a high skilled React front-end developer with good experience in blockchain, I read your post carefully and noticed that my skills are a great fit for your project.

I have already been involved in many innovative NFT projects(ERC721/1155 Contract, Mint WebSite, NFT MarketPlace) that are technically flawless. I am a Blockchain expert in developing NFT minting and NFT marketplace with full stack technology. So no problem with satisfying your requirement seamlessly.

- My recent works
https://www.bossbullsclub.com/
https://www.cryptodickbutts.com/
https://bullieverisland.com/
https://wooshi.world/
https://pets.micropets.io/

I have already professional skills in the Blockchain ecosystem like React, Web3, and Solidity, etc by performing these projects. Also, I have built many frontends that are connected and interacted with Smart Contract(NFT - ERC721, ERC20, etc) via React, Web3, Metamask, truffle and so I am confident in your project.

My skills:
✔ ReactJS, , Web3, React Native, Typescript, NodeJS, Express
✔ UI/UX, responsive web
✔ Blockchain, Ethereum, Smart Contract, Solidity
✔ HTML5, CSS, Sass/Less, Bootstrap
✔ Webpack, Gulp, Babel, etc

I'd like to work on your project with you because that fits with just my skills. I would like to discuss it with you in more detail via chatting.

Thanks for reading my proposal.
Looking forward to hearing from you.

- This is my contact info.
Discord : mRcoin#4355
Telegram : @mRcoin1220
Whatsapp : +381612368170

Best Regards

Perfect

Sunday, October 31, 2021   3:11 PM

Hi, After carefully looking at your website https://redbutton.wtf where you need to implement the NFT mint function, I noticed that your project is very similar to the NFT mint project I have already developed.

First of all, please take a look at this video showing my project of randomly minting NFTs from a collection of 10000 arts and the screenshot where can see the NFTs minted from the wallet. Added the attachments below.

In this project, I realized the following functions.

- Write a contract for NFT minting using Rust in the Solana blockchain
- use React and Typescript to build a frontend for the NFT mint function and wallet connection
- used web3 to interact with the contract

I am a Blockchain expert in developing NFT minting and NFT marketplace with full stack technology.

As a senior blockchain developer, in addition to projects like the above, I have already participated in many innovative NFT projects that are technically flawless (ERC721/1155 Contract, Mint WebSite, NFT Market Place). So, there is no problem with seamlessly meeting your requirements.

- My recent works
https://cryptoetsnft.io/
https://desertedzebras.com/
https://www.thekittybutts.com/
https://faraland.io/
https://themekaverse.com/

- My services

* upload arts to IPFS and get metadata, tokenURI
* create ERC721 smart contract or Rust program for NFT mint
* create a frontend for mint NFT and show minted NFT - with React, Typescript
* wallet connection(Metamask, binance wallet, Phantom, wallet connect, and trust wallet) and web3 integration with web3.js and ether.js
-buy and sell minted NFT on this frontend directly or secondary marketplace like opensea.io

So I can even deploy your project on testnet in which you don't have to pay for gas fees and then if you are satisfied, you can safely deploy it on Mainnet.

I will do my best for you to provide High Quality and High Speed.

Best Regards

Blockchain fullstack experience

Friday, October 8, 2021   8:27 PM

In these projects, I've written and deployed NFT in truffle or Remix environments with ERC721

Also, I made the frontend that can be connected to Metamask or other wallets like the URL I showed using React/Typescript/Web3

and then I configured the NFT minter so that the frontend made interact with smart contract via wallet, and minted NFTs

also, I've linked the site to the NFT marketplace like opensea to be able to trade NFTs minted

in a word, as a full stack blockchain expert, i can integrate frontend(React/Web3) and backend(smart contract).

I have solid experience in writing and deploying smart contracts to the blockchain network using solidity in Remix and truffle environments, and developing full stack blockchain projects so that frontends can interact with the deployed contract using React, Web3, Metamask and other APIs

I am confident that I can fully assist you, based on my skills and experience.

-create smart contracts for main token, masterchef, referral and vaults
-create the front-end website or forked defi dapps like uniswap and pancakeswap
-wallet connection(metamask, binance wallet, wallet connect and trust wallet) and web3 integration with web3.js and ether.js
- NFT-Art-Generator : generate randomlessly images (by kind)
- save the images to IPFS storage and upload metadata to the marketplace. (using pinata API)
- smart contracts: NFT.sol, NftMarketplace.sol
- build NFT minting engine, and market item creation, market item sale, etc on NFT marketplace
- add auction function, presale function, limited minting function, etc

Blockchain frontend

Hi, there!
As a front-end developer with a lot of experience in blockchain, I read your job description carefully and noticed that my skills are a great fit for your project.
I can integrate your frontend to NFT and write/deploy Smart Contract as per your specifications perfectly.
I am a front-end developer with rich experience in blockchain.

- My works
https://cryptoetsnft.io/
https://desertedzebras.com/
https://www.thekittybutts.com/
https://www.secretsocietyofwhales.com/
https://www.thekittybutts.com/

I have professional skills in the Blockchain ecosystem like React, Web3, and Solidity, etc.
I have performed many projects that are connected and interacted with Smart Contract(NFT - ERC721, ERC20, etc) via React, Web3, Metamask, truffle and so I am confident in this project.
I would like to discuss it with you in more detail via chatting.

Technologies :
✔ Blockchain, Ethereum, Smart Contract, Solidity, Web3
✔ Angular, ReactJS, React Native, Flutter
✔ NodeJS, Express, Laravel, Django
✔ SQL(MySQL,), NoSQL(MongoDB, CouchDB)
✔ HTML5, CSS, Sass/Less, Bootstrap
✔ PHP, Javascript, jQuery, DHTMLX, Typescript, D3.js, Socket.IO, Three.js
✔ Webpack, Gulp, Babel, etc
✔ UI/UX, responsive web

I'd like to work on your project with you because that fits with just my skills.
Thanks for reading my proposal.
Looking forward to hearing from you

React NFT

Hi, As a high skilled React front-end developer with good experience in blockchain, I read your post carefully and noticed that my skills are a great fit for your project.

I have already been involved in many innovative NFT projects(ERC721/1155 Contract, Mint WebSite, NFT MarketPlace) that are technically flawless. I am a Blockchain expert in developing NFT minting and NFT marketplace with full stack technology. So no problem with satisfying your requirement seamlessly.

- My recent NFT projects
https://wooshi.world/
https://pets.micropets.io/
https://faraland.io/
https://alpha.art/
https://desertedzebras.com/

I have already professional skills in the Blockchain ecosystem like React, Web3, and Solidity, etc by performing these projects. Also, I have built many frontends that are connected and interacted with Smart Contract(NFT - ERC721, ERC20, etc) via React, Web3, Metamask, truffle and so I am confident in your project.

My skills:
✔ ReactJS, , Web3, React Native, Typescript, NodeJS, Express
✔ Blockchain, Ethereum, Smart Contract, Solidity
✔ HTML5, CSS, Sass/Less, Bootstrap
✔ Webpack, Gulp, Babel, etc
✔ UI/UX, responsive web

I'd like to work on your project with you because that fits with just my skills. I would like to discuss it with you in more detail via chatting.

Thanks for reading my proposal.
Looking forward to hearing from you
Best Regards

Blockchain full stack

Tuesday, October 5, 2021   11:32 PM

Hi, After reading your post carefully, I can see that you are looking for a Blockchain full-stack expert who can make good use of the blockchain network by using smart contracts, web3, and other APIs.

I have solid experience in writing and deploying smart contracts to the blockchain network using solidity in Remix and truffle environments, and developing full stack blockchain projects so that frontends can interact with the deployed contract using React, Web3, Metamask, and other APIs.

My recent work
https://download.thekittybutts.com/
https://beta.boojabaunga.com/
https://www.sphynxnft.com/
https://galaxyfightclub.com/
https://bullieverisland.com/
https://therapsnft.com/

As I am a full stack expert proficient in React/Web3 frontend and have deep knowledge and rich experience in blockchain, I am sure that I can complete your project without any problem.

Hope you discuss this via chat in more detail.
Thank you for reading my proposal.
I look forward to hearing from you.

Sincerely

Blockchain game

Tuesday, October 12, 2021   5:52 PM

Hi, As a senior blockchain developer, I have already been involved in many innovative NFT projects(ERC721/1155 Contract, Mint WebSite, NFT Market Place) that are technically flawless.
So No problem with satisfying your requirement seamlessly.

- My works
https://download.thekittybutts.com/
https://beta.boojabaunga.com/
https://www.sphynxnft.com/
https://galaxyfightclub.com/
https://bullieverisland.com/

https://drive.google.com/file/d/1qECt1b1VhxrZjiod7izB17kgdvZuYlZM/view?usp=sharing

I'm extremely interested in your project and I will do my best if you hire me.
Thanks for reading my proposal.
Best Regards

Blockchain expert

Hello, Blockchain developer Here
I am a developer of Polywhale, Polynx.
Blockchain developer specialized in custom cryptocurrency and blockchain based Enterprise solutions. I have extensive experience in ICO's, STO's, Customising Consensus(POS/POW), Cryptoexchange, Wallets and crypto-bot design, DApps, blockchain websites, web portals, & smart contracts applications development.
As a full-stack blockchain developer & solidity programmer, I have successfully delivered a wide range of custom cryptocurrency and blockchain development projects using the smart contracts solidity language with eye-catching user-friendly UI design and high-end functionalities. I understand all aspects of developing Blockchain applications: design, architecture, development, and publishing.

- ✅ Custom Blockchain Development
- ✅ Smart Contracts Development
- ✅ dApps Development
- ✅ Hyperledger & Multichain Development
- ✅ Custom Cryptocurrency Development
- ✅ Cryptocurrency Wallet and Exchange Applications
- ✅ Private Blockchain Development
- ✅ Blockchain Consulting
- ✅ Ongoing Blockchain Development Support and Maintenance

I'm flexible with my working hours and will be appreciated to discuss your project at your earliest convenience.
Hope that we can work together to make your company a success.
Best Regards

Smart Contract

Thursday, October 14, 2021   6:23 PM

Hello, how are you?
I am lead developer of CWC project. (NFT on Ethereum)
https://www.cryptowatchclub.com

This is the contracts I deployed.
https://etherscan.io/address/0x47ea2393c2684600d869f27a519016bdec98cf69

This is example of IPFS storage I have.
https://ipfs.io/ipfs/QmZcrAAoWJbLD26cwfXYR5nuamZXkPFXFbx79z1Asonnnu/0
https://ipfs.io/ipfs/QmdNFn4AJYFKELCXK5B2wC9vnVcwdRxEhX9aJhygwu5RDB/0.png

This is test Opensea list.
https://testnets.opensea.io/collection/testd-v4

I am very experienced in NFT/Smart contracts development (ERC20/ERC721)

Please contract me

Regards

Solana NFT

Saturday, October 16, 2021   8:42 AM

Hello
As a senior NFT & financial blockchain engineer and full stack web developer, I am very interested in this project.

Using solidity, web3.js and smart contract, I have added collections and 10k NFTs including ERC721 and ERC1155 assets on Ethereum mainnet.
In Solana network, I have developed an NFT minting site with 10k nfts using metaplex and Candy Machine, integrated to phantom using web3.js
I have developed many NFTs market places on the multichain network and you can check on opensea.io.
And also I have been developing smart contract using Rust.

These are my latest project above skills.

https://cryptotrunks.co (Ethereum mainnet)
https://thedudes.art (Ethereum mainnet)
https://solpunks.com (Solana)
https://sollamas.com (Solana)

I'm ready to discuss your project and start immediately.
I am a full-time developer so you can contact with any time and I will show results every day.
I am focusing on Trust & Credit to build a good relationship with customers.
Sincerely hope to work with you.

Regards.

Pancakeswap, transaction

Saturday, October 9, 2021   3:00 AM

Good day, I read the description of your project and I am highly convinced that your requirements fall well within my abilities and skills:
* Metatrader 4 and 5 indicator and EA.
* Pine Script for Tradingview
* Crypto Bot (Pancakeswap, Uniswap, Binance, Bybit etc..)
* Crypto Coins Exchange Development
* Blockchain Game Development
* Bitcoin, Ethereum, Web3.js, React.js
* ICO Development with Created Token (Coin), IDO, DEX
* Smart-Contracts (Solidity, Truffle framework)
* Token development (BEP20, ERC20, ERC223,, ERC 1155)
* Cryptocurrency Wallet and Exchange Applications
* NFT(Non Fungible Token) Marketplace and Games — ERC721, Solana, TRON
Kindly message and we will discuss this project further.

As a senior blockchain developer, I have much experiences with trading bot creation.
I am very familiar with snipping, front-running bot.
I can do this project like this.
-scan the mempool by ether.js
-detect large transactions
-run the transactions with high gas price

NFT+Web3+Wallet+Market

Saturday, October 9, 2021   2:41 AM

Hi, there!
I read your job description and found it a great match for your requirements and my skill.

As a senior blockchain developer, I have already been involved in many innovative blockchain projects(ERC721/1155 Contract, Mint WebSite, NFT Market Place) that are technically flawless.
So no problem with satisfying your requirement seamlessly.

- My works
https://cryptoetsnft.io/
https://desertedzebras.com/
https://www.thekittybutts.com/
https://www.secretsocietyofwhales.com/
https://www.thekittybutts.com/
https://therubberduck.io/
https://lionclub.sportsicon.co/

I have solved the following points while developing these sites.

-wallet connection(Metamask, binance wallet, wallet connect and trust wallet) and web3 integration with web3.js and ether.js
-upload arts and metadata to pinata
-create ERC721 smart contract for NFT
-create a website for mint NFT and show minted NFT
-buy and sell minted NFT on a secondary marketplace like opensea.io

I'd like to work on your project with you because that fits with just my skills.
Thanks for reading my proposal.
Looking forward to hearing from you

NFT Marketplace

============ My experience for NFT marketplace =============
- NFT-Art-Generator : generate randomlessly images (by kind)
- save image to IPFS storage and upload metadata to marketplace. (using pinata api)
- smart contracts: NFT.sol, NftMarketplace.sol
- build NFT minting engine, and market item creation, market item sale, etc on NFT marketplace.
- add auction function, presale function, limited minting function, etc
I can complete frontend+backend+smart contracts 100% successfully within a short period.
I also developed NFT-Art-Generator.

If you are looking to join a team and looking for a challenge, apply to our job posting. To indicate that you have read the post thoroughly, begin with 'I am a Smart Contract expert' and describe your solidity experience specifically. Otherwise, it will be reported as spam and your account will be closed.
I look forward to speaking with you soon!

Defi, Solidity

Saturday, October 16, 2021   4:29 AM

Hello

As a senior blockchain & financial engineer and full stack web developer, I am very interested in this project.

I have developed a Hybrid (Ce-FI & De-FI) Exchange and Trading (Margin & Futures) Platform from scratch as a project manager and upgraded an ongoing Exchange platform with new features of Blockchain technology and AI-based solution for client portfolio management and balance risk management of the platform before.

And I have rich experiences of token migration and integrating swaps(Uniswap v2, Uniswap v3 on Etherem Network, Sushi, Pancake, Warden swap on BSC Network)
This is the latest swap project on development.
http://164.90.175.96/#/swap

DEXFIN (Czechia Exchange and Trading Platform)
Site: https://dexfin.com/
Tech-stack: Web-CeFI (React.js / Redux-Thunk + Laravel), Web-DeFI (React.js + Web3.js + Smart Contracts)
As a lead developer, I planned the structure of the smart contract with separated contracts and Escrow contracts for security and audit and developed mainly part in smart contracts using Hardhat environment in Solidity.
And integrate contracts into FE using Web3.js and Metamask connection into React.js based project.

Could you contact me via chat and discuss in detail about this project?

Regards and Thanks.

Defi

I have experience building an exchange that allows traders to trade US dollars for gold using ethereum blockchain, and a Market Maker that trades US Dollars (USD), UK Pounds (GBP), and EUR.

Stanica

Within hours(mins)

Saturday, July 17, 2021   5:28 PM

hello, as a professional Nodejs developer i can finish your job within hours. i can start right now and will do my best
thank you and Best regards
Stanica

Html, css responsive

Hello
Greetings of the day!

I'm a senior web developer with rich experience in HTML, CSS, JavaScript, and PHP.
Also, have a good UI design skill and I'm very familiar with pixel-perfect.
I can build your responsive website in a short time.
As I'm free now, willing to work on the project full-time.

Thank you for considering my cover letter.
Stanica

Hi I hope you are doing well.
As a senior CSS expert, I can complete your project for mobile friendly in a short time.

I read your requirements very carefully and understand your needs.
This work really attracts me, and I have done similar work before, so I have rich experiences and good knowledge over 6+ years working with BOOTSTRAP, jQuery, HTML5, CSS3.

I can start work immediately and can deliver high-quality results within the deadline.
Please discuss in more detail the project via chat.
Best regards. Thanks again.
Stanica

♡Warm greeting♡
I read your posting carefully.
I have rich experience in the front end with html,css, materialize and bootstrap, javascript and jquery.
Don't worry about quality.
I always provide perfect results like pixel-perfect, fully responsive, mobile-friendly, and user-friendly.
Please send me a message and let's discuss this in detail.
Thanks!

Full time

Wednesday, September 15, 2021   1:50 PM

Hi, By reading your job description, I could get that you are looking for a talented front-end developer.

First of all, I'm located in Serbia which means I can fully commit to our project in your working time.

Here are some of my previous projects that can prove my skills;
studykik.com
wolt.com

I started my career with Javascript, moving to its frameworks like React.js, Angular, Vue.js, and now I'm mastering full-stack development skills like MEAN, MERN, MEVN stack skills.

The most important thing is that I'm meticulous in details and have a keen eye for design.

I'm available for 40 hrs/week and ready to start right now.
It would be great if we have more discussion about your project.
Regards

Stanica
